SUMMARY

Software engineer with a dual BSc from the United Kingdom and Malaysia, building production mobile apps and web platforms for businesses in Saudi Arabia. Currently at Jaddaf, delivering client platforms end to end; previously shipped Angular components into Ashal's IT-solutions system. Specialises in Arabic-first, bilingual right-to-left interfaces, REST API integration and deployment.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Firebase, Android, iOS
Web: Angular, React, TypeScript, JavaScript, HTML5, CSS, Bootstrap 5
Backend and Data: REST APIs, Node.js, PHP, C#, MySQL, SQL Server, Authentication
Practices and Tools: RTL and bilingual UI, Responsive design, SEO, Performance, Git, Azure, Docker, Figma

PROFESSIONAL EXPERIENCE

Software Engineer | Jaddaf, Saudi Arabia *2026 - Present*

- Build and ship client web platforms and mobile applications end to end, from interface through API integration to deployment.
- Delivered libro-mea.com, a bilingual e-commerce storefront for smart watches and bracelets.
- Building CustomStudio, an internal product and packaging control system with role-based accounts, Arabic-first throughout.

Front-End Developer | Ashal IT Solutions, Saudi Arabia *2026 (3 months)*

- Contributed production pages and components to Ashal's integrated IT-solutions platform.
- Learned Angular on the job and was shipping to the live front end within weeks, building full right-to-left layouts with TypeScript and Bootstrap 5 on Azure.

Freelance Flutter and Web Developer | Saudi Arabia *2023 - 2026*

- Shipped cross-platform Flutter applications for tailoring workshops, restaurants and pharmacies.
- Built and launched business websites including Olyx, Alkhayala, Helabi and Johnson PPF, covering requirements, UI, API and database integration through to handover.

Web Developer | KidoCode, Kuala Lumpur, Malaysia *2022 - 2023*

- Built and maintained the company's web pages and internal tools over one year.
- Turned designs into responsive interfaces and contributed to the Cubie learning platform.

SELECTED PROJECTS

- **CustomStudio** custmiz.netlify.app - Internal product and packaging control system, Arabic-first, one account per role. In progress.
- **Libro** libro-mea.com - Bilingual e-commerce storefront for smart watches and bracelets.
- **Ashal IT Solutions** ashalfront.azurewebsites.net - Angular front end for an integrated IT-solutions company.
- **Olyx** olyxsa.com - Digital agency platform giving clients a bilingual site with an Arabic admin panel.
- **Taqaseem** - Flutter operations app for tailoring workshops: measurements, inventory, order stages and WhatsApp updates.
