5.1 Introduction

The study's findings are reported and analysed in this chapter in relation to the study's purpose and objectives, which were to determine the impact of implementing a pharmacy management system. This chapter will demonstrate the outcome of the intended phases in developing a pharmacy management system application. This project's outcome is consistent with FYP1's previous goals and objectives.

And in this chapter, I have a picture that shows how the application works and what are the stages through which the application passes.

5.2 Results of the project

In this section, I will show examples of my app project (pharmacy management system) outcome and how far I have achieved and met the project's goals and objectives. As well as the lifted areas to be worked on in the future, where I will have the flexibility and time to rest and build the application without being stressed.

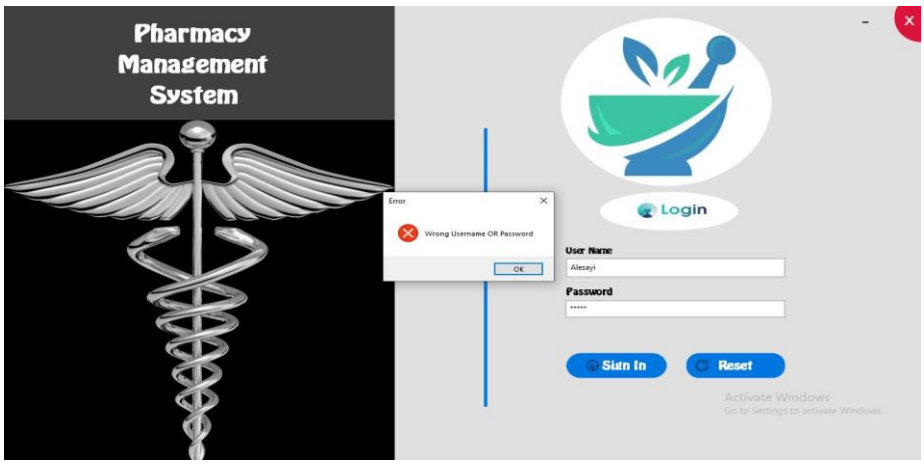

Figure 0 1 Login interface

Username: Alesayi

Password: 737

This is the login page for all the users which is the main interface for the application when users open the app and from there, they can close the application, also when the users used wrong username or password, they can't login.

5.2.1 Admin Page (examples)

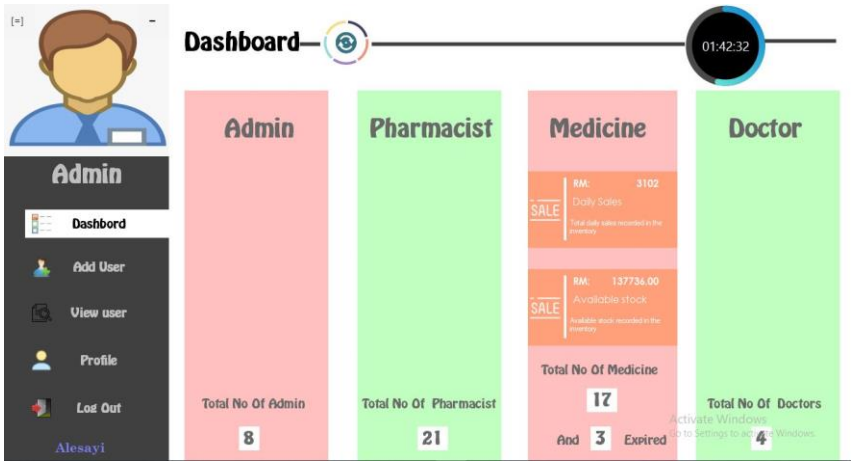

Figure 0 2 Admin Dashboard

Dashboard which admin can see the daily sales and the available stock and the total number of all the users and medicines as available or expired.

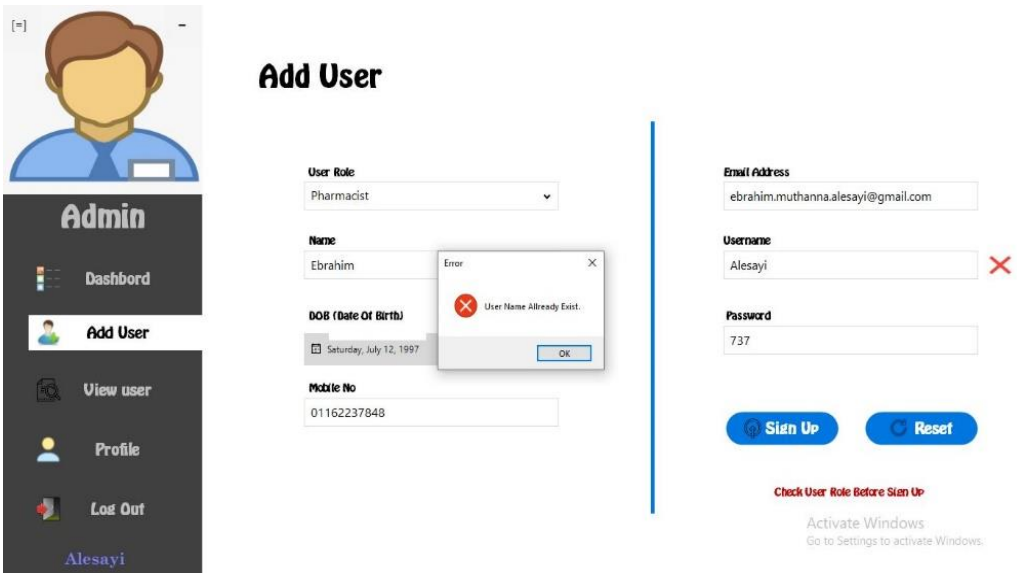

Figure 0 2 Admin Add Users

Add users, as we can see the admin only who can add new users but if the username already exists, then the admin must change the username to add new users

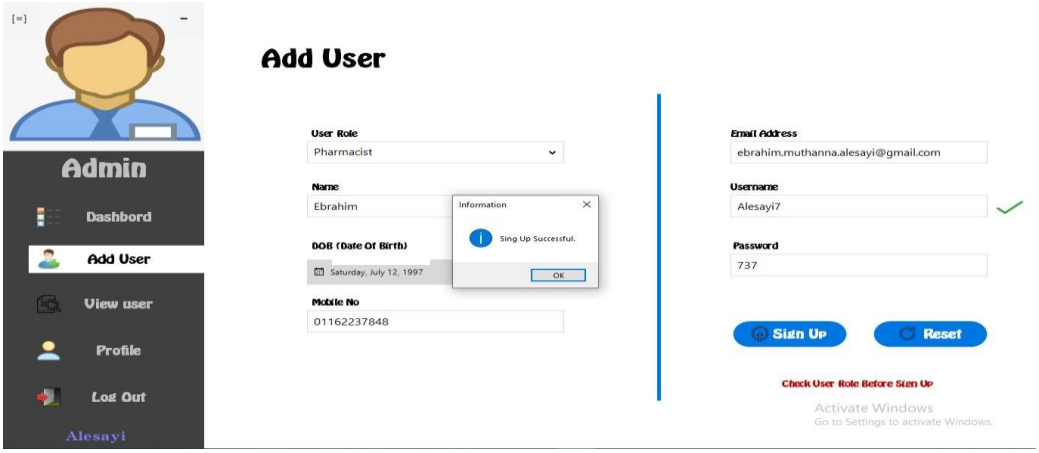

Figure 0 3 Admin Add Users

As shows on figure 0 3 when the admin added all the information and the username have not been used before then the sing up is successful.

View users from this page the admin can see all of the user's information's although admin can search for any username.

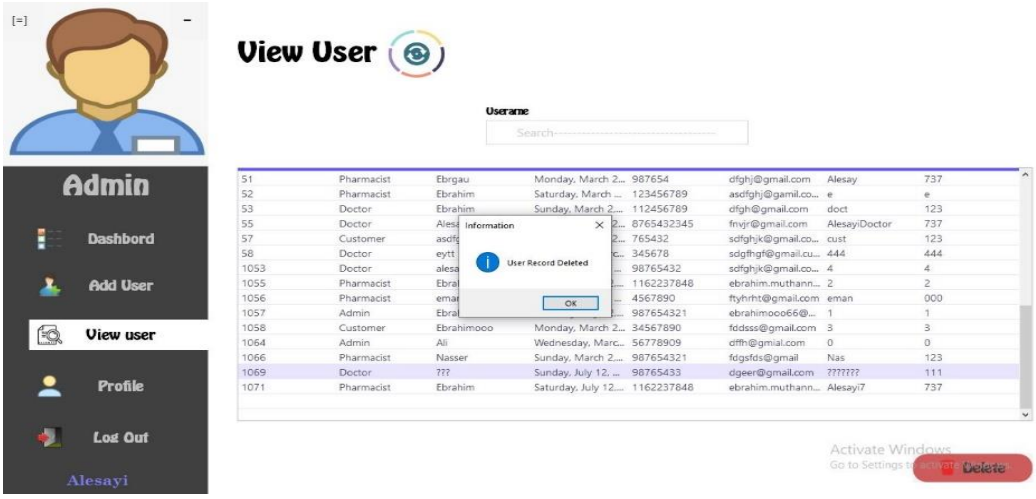

Figure 0 4 Admin view Users

Also, the admin just selects any user from the list and delete as showed in the message in figure 0 4.

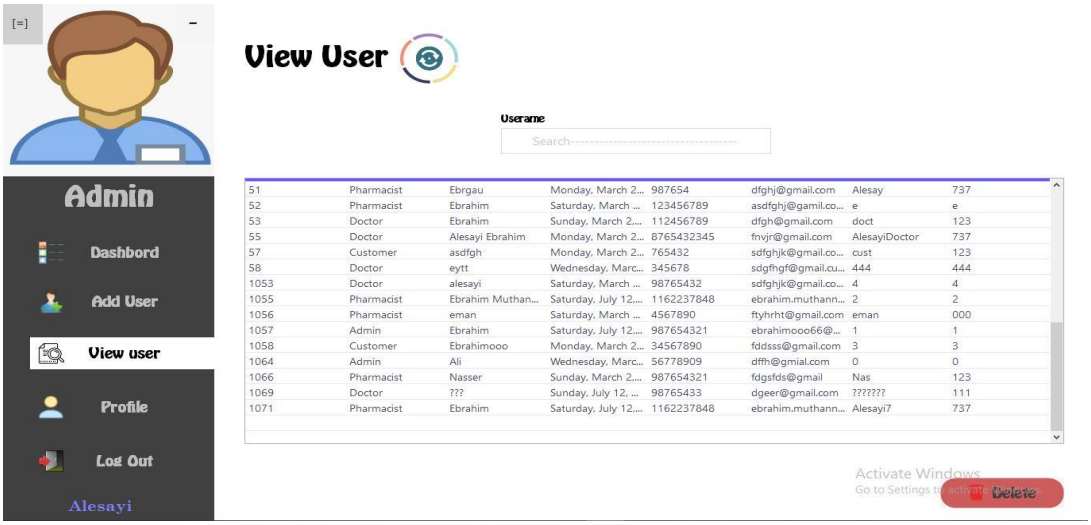

Figure 0 5 Admin view Users

And this picture shows that the user who was deleted by the administrator has already been deleted and cannot log in again.

The admin can just taches the secern anywhere and his information will be automatically appear

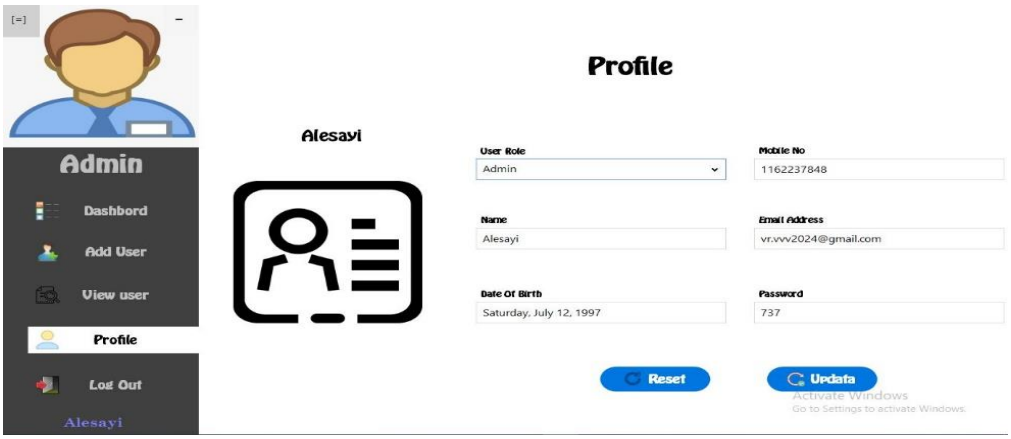

Figure 0 6 Admin Profile

So, he can change his own information and update as well as he can change his password and username.

5.2.2 Pharmacist Page (examples)

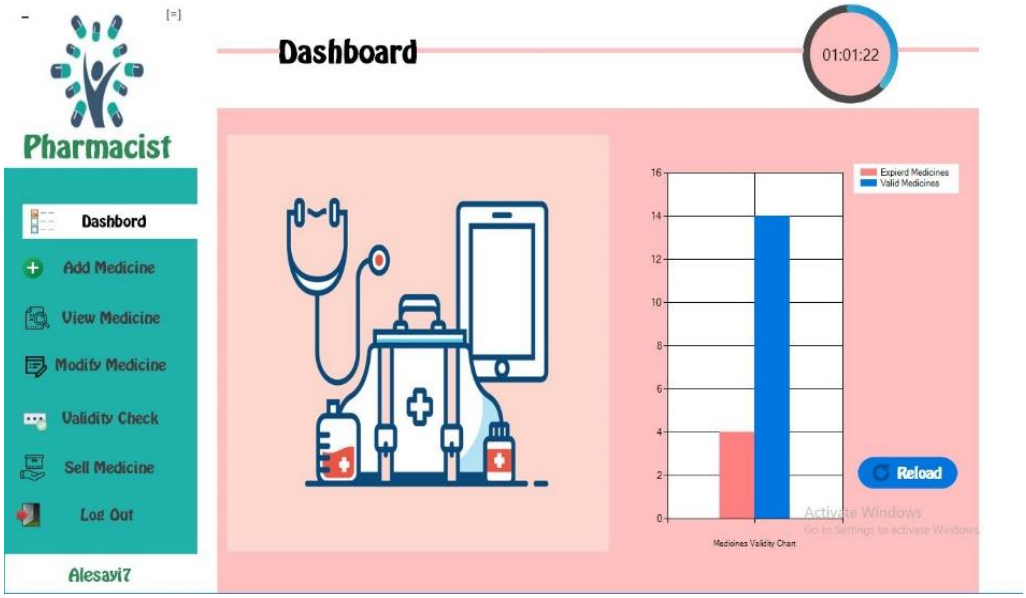

Figure 0 7 Pharmacist Dashboard

Dashboard Pharmacist we can see that there is a graph, through which the Pharmacist can see the expired medicines and the medicines that are usable.

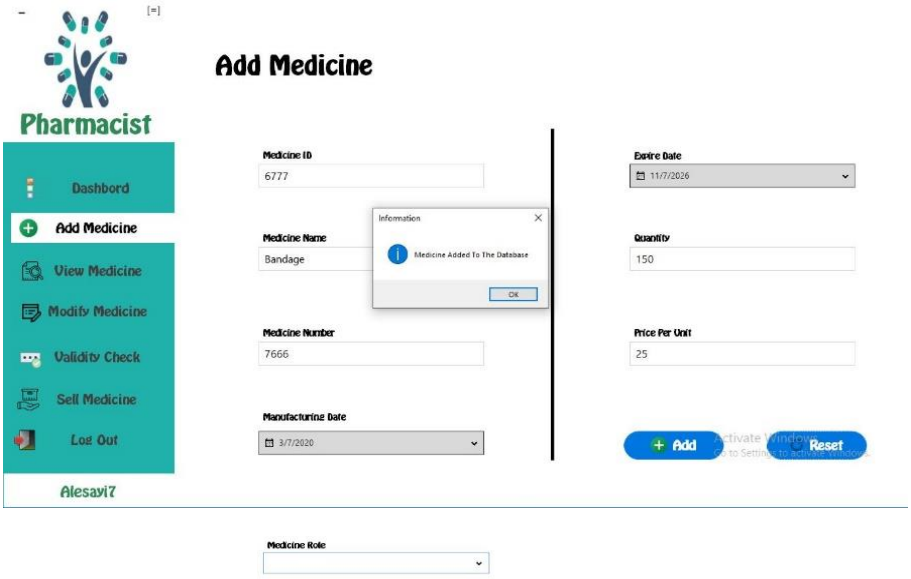

Figure 0 8 Pharmacist Add medicine

Add medicine, as we can see the Pharmacist only who can add new medicine and there is an information message that said medicine added to the databases.

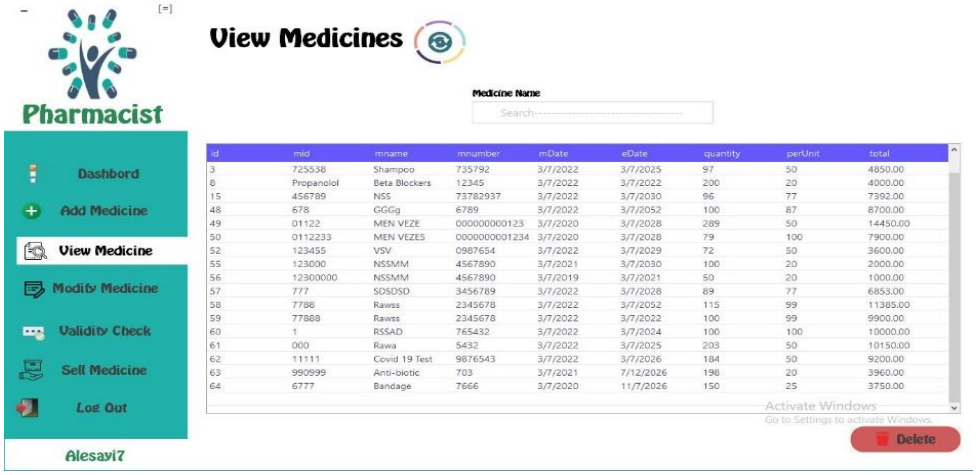

Figure 0 9 Pharmacist Add medicine

View medicine from this page the Pharmacist can see all the medicines information's although Pharmacist can search for any medicine name.

Also, the Pharmacist can just select any medicine from the list and delete it

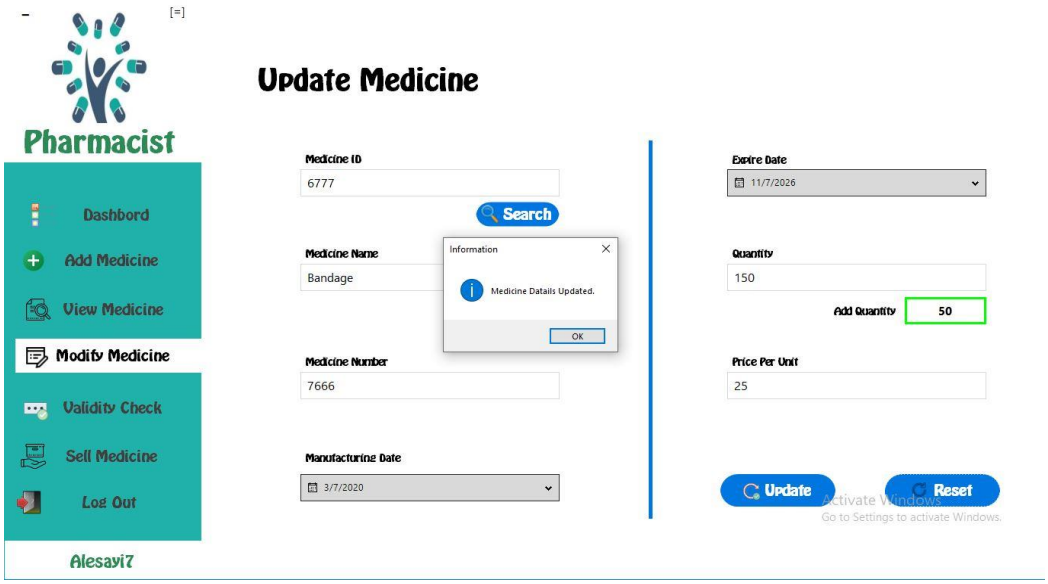

Figure 0 10 Pharmacist Update medicine

Here as we can see in figure 0 10 the Pharmacist can search for any medicine by the medicine ID

And update the medicines information also adding a new quantity.

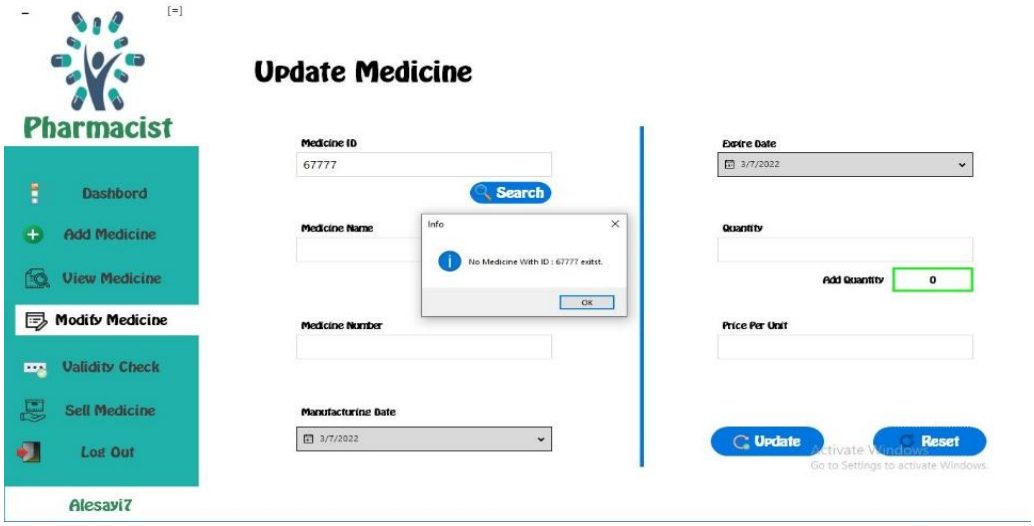

Figure 0 11 Pharmacist Update medicine

The Pharmacist can search for any medicine by the medicine ID but if there are no medicines have the same ID in the system there will be a message as we can see in Figure 0 11.

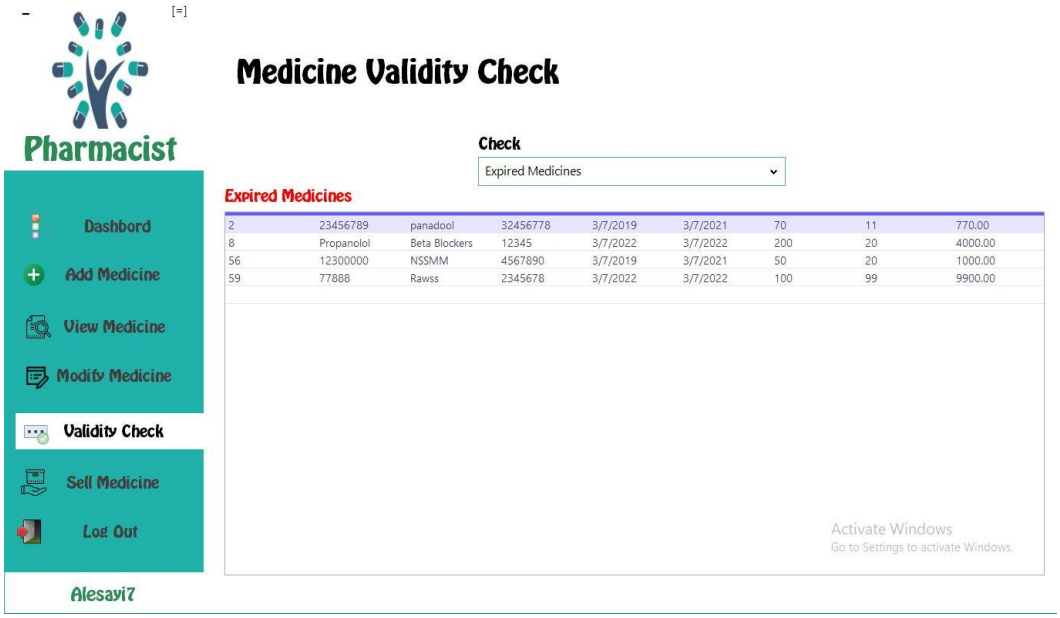

Figure 0 11 Pharmacist Validity check

As the Pharmacist can see how many medicines are already expired as well as form here, he can see whish medicines from the check.

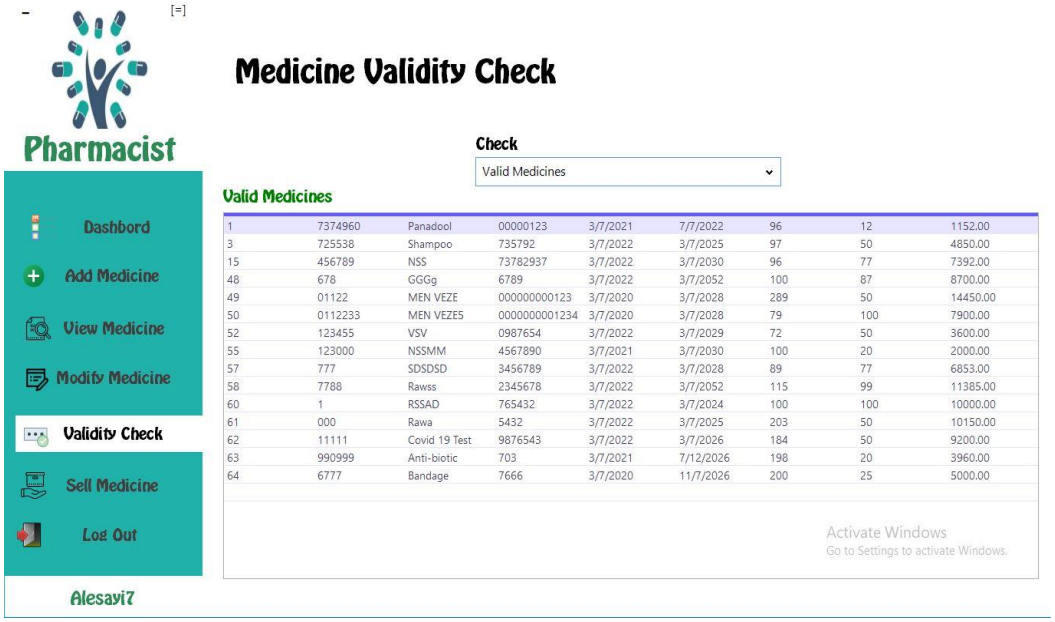

Figure 0 12 Pharmacist Validity check

As well as Pharmacist can see the Valid medicines with there information as shows In Figure 0 12.

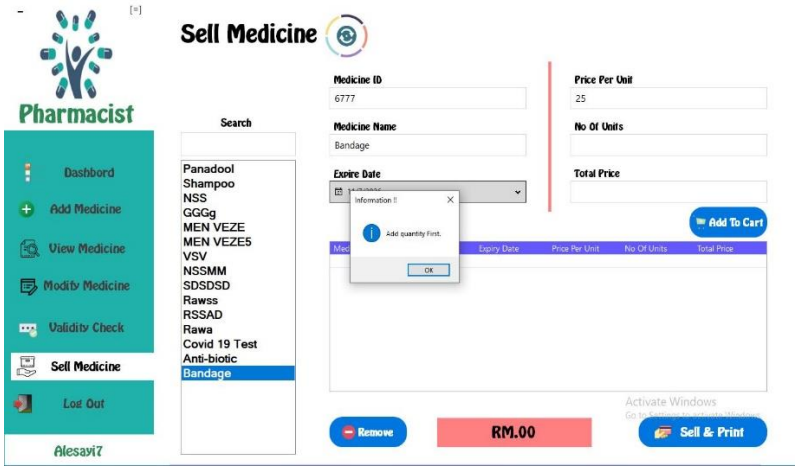

Figure 0 13 Pharmacist sell medicines

This is the massage that popup when the Pharmacist trye to add to cart without putting any units for the medicines whish says add quantity first.

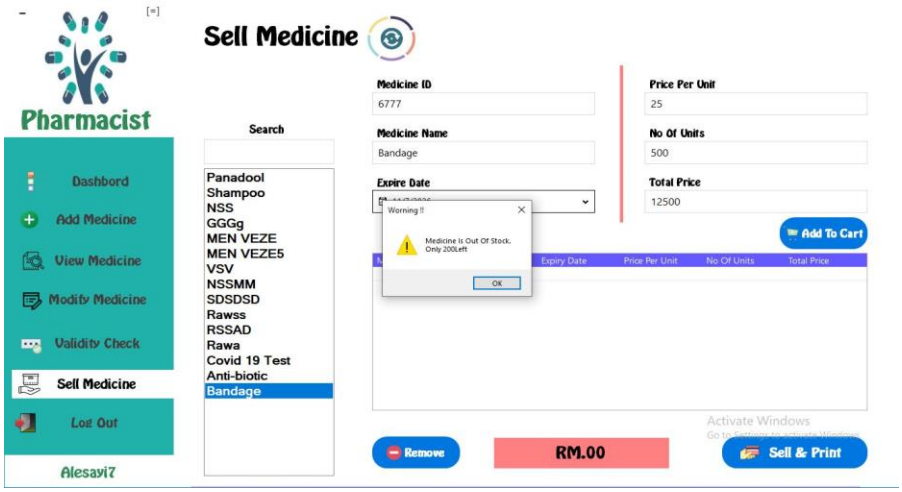

Figure 0 14 Pharmacist sell medicines

This is the massage that popup when the Pharmacist trye to add to cart more the medicines that are available whish says medicines out of stoke only left (the number of medicines available).

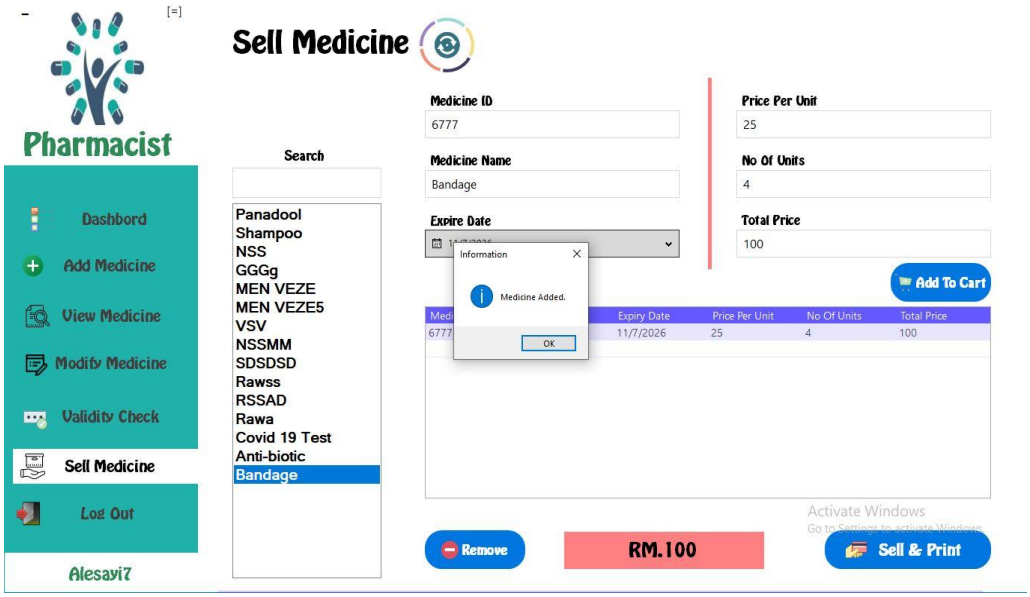

Figure 0 15 Pharmacist sell medicines

When the Pharmacist added normal quantities the adding to cart is successful and the Pharmacist can sell the medication that no need Prescription.

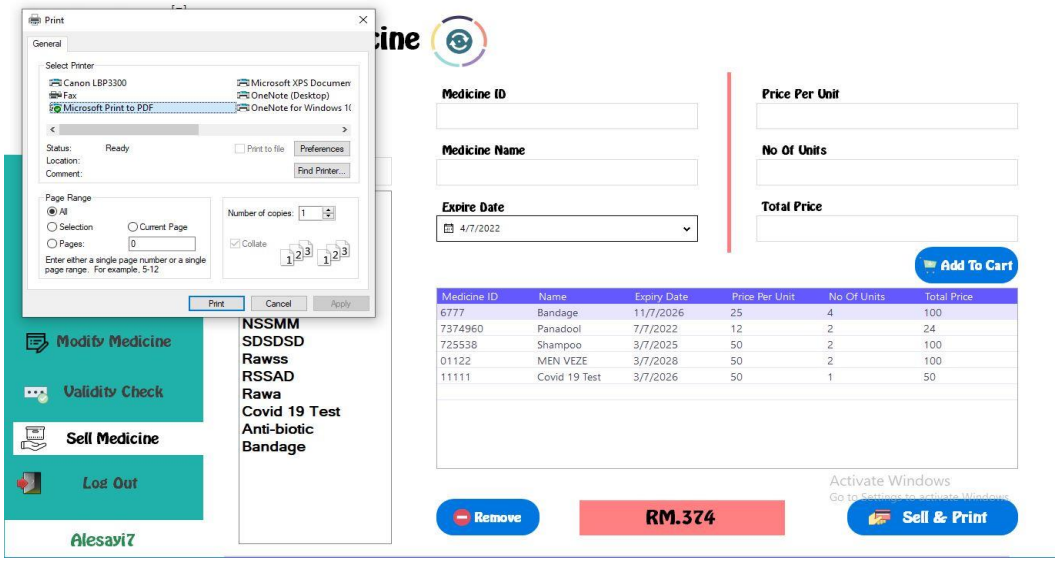

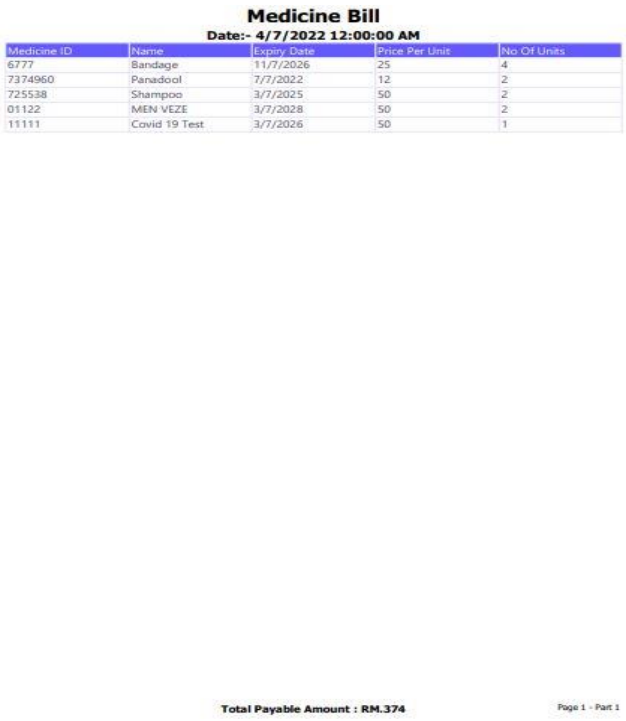

Figure 0 16 Pharmacist sell medicine

When is the order is already in place Pharmacist can remove if needed or sell& print.

Medicine Bill

Date:- 4/7/2022 12:00:00 AM

Medicine ID	Name	Expiry Date	Price Per Unit	No Of Units
6777	Bandage	11/7/2026	25	4
7374960	Panadool	7/7/2022	12	2
725538	Shampoo	3/7/2025	50	2
01122	MEN VEZE	3/7/2028	50	2
11111	Covid 19 Test	3/7/2026	50	1

Total Payable Amount : RM.374

Page 1 - Part 1

Figure 0 17 Pharmacist sell medicines

This is the PDF medicines bill showing the Date and time and all the information also in the end of the bill there is the total payable amount. In RM

5.2.3 Doctor Page (examples)

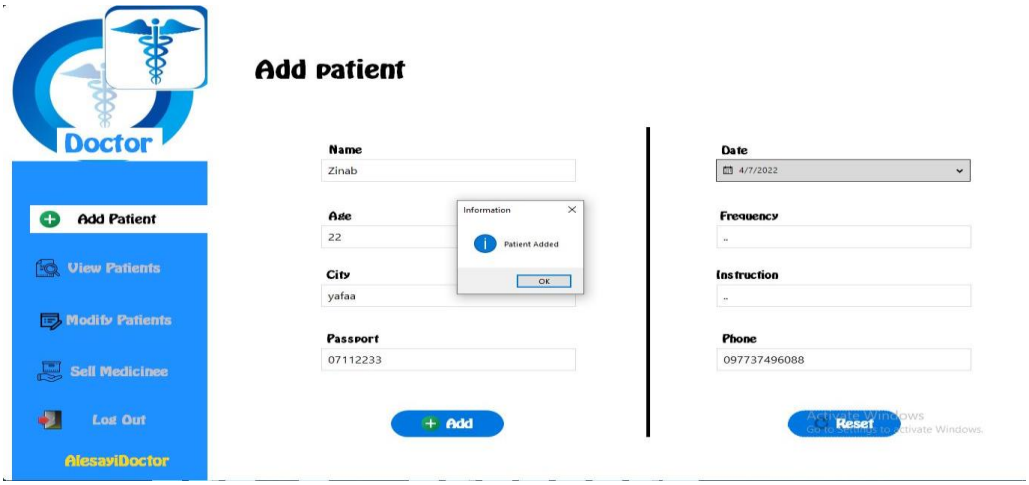

Figure 0 18 Doctor Add patient

Add patient, as we can see the Doctor only who can add new patient and there is an information message that said patient added.

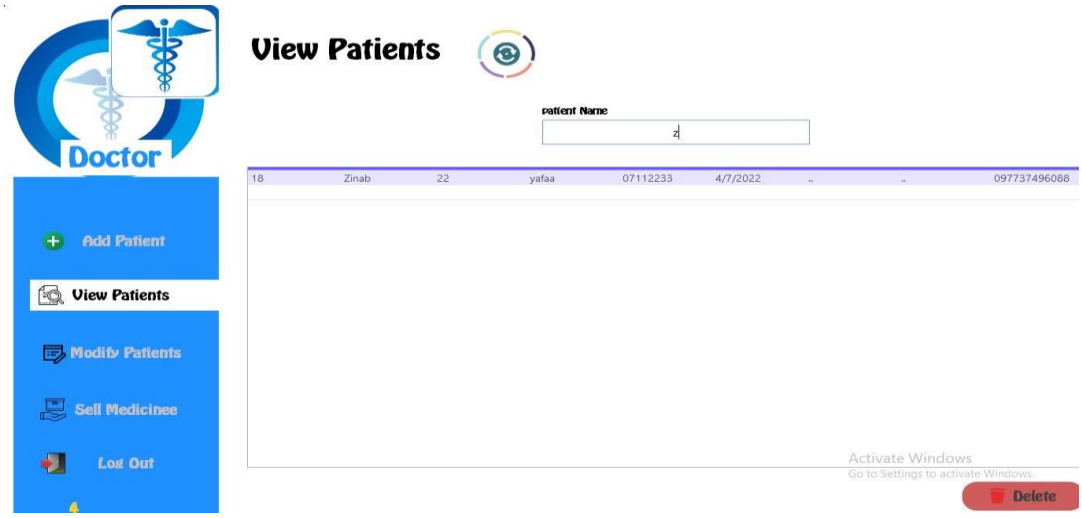

Figure 0 19 Doctor view patient

View patient from this page the Doctor can see all the patient information's although Doctor can search for any patient name.

Also, the Doctor can just select any patient from the list and delete it.

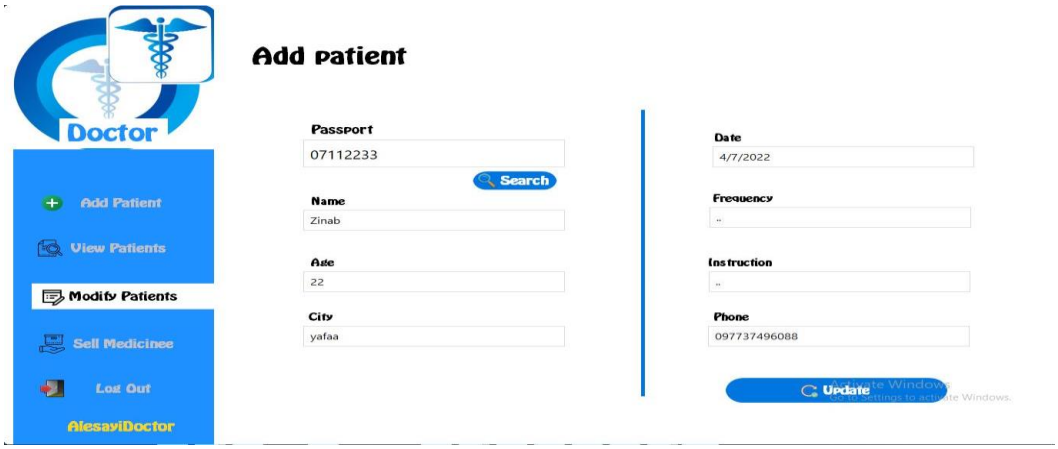

Figure 0 20 Doctor Update patient

From here the doctor can search for the patient by their passport or id and update the information.

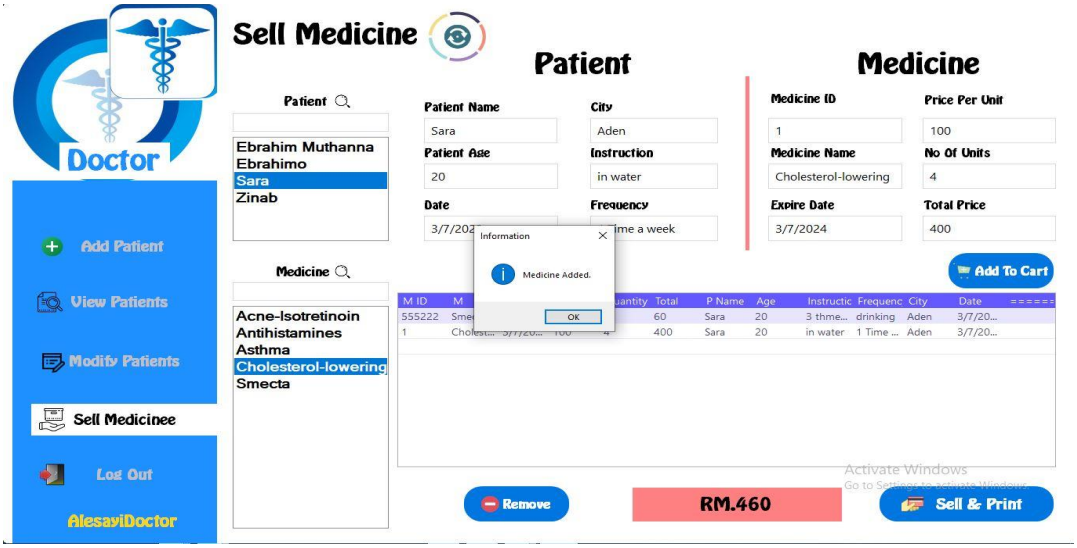

Figure 0 21 Doctor Update patient

Doctor can add a patient and also add medicine for the patient with the instructions and frequency, then he can add to cart as well as can sell and print as the Pharmacist.

5.3 Evaluation of the product

To begin with, as humans, we may make promises, we may find justifications to justify not keeping those commitments. So, without a doubt, each project has its own set of strengths and limitations, with some projects' strengths outnumbering their shortcomings and vice versa. The following are the strengths of my project constants.

For the administers platform

- Login
- Registration of new users
