SUMMARY

Full-stack software engineer who builds web platforms and mobile apps, from the first screen through the API to deployment. I spent three years freelancing remotely for small businesses, shipping Flutter apps and bilingual websites, then moved in-house at Ashal and now Jaddaf in Saudi Arabia. Most of my work is Arabic-first with full right-to-left support. Dual BSc in Software Engineering from the UK and Malaysia.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Firebase, Android, iOS
Web: Angular, React, TypeScript, JavaScript, HTML5, CSS, Bootstrap 5
Backend and Data: REST APIs, Node.js, PHP, C#, MySQL, SQL Server, Authentication
Practices and Tools: RTL and bilingual UI, Responsive design, SEO, Performance, Git, Azure, Docker, Figma

PROFESSIONAL EXPERIENCE

Software Engineer | Jaddaf, Saudi Arabia | *2026 - Present*

- Build and ship client web platforms and mobile apps end to end: interface, API integration and deployment.
- Delivered libro-mea.com, a bilingual online store for smart watches and bracelets, built in React.
- Integrate REST APIs, payments and dashboards, and keep every build responsive in Arabic and English.
- Building CustomStudio from scratch, an internal system for product and packaging operations with role-based accounts, Arabic-first throughout.

Front-End Developer | Ashal IT Solutions, Saudi Arabia | *2026 (3 months)*

- Contributed production pages and components to Ashal's integrated IT-solutions platform.
- Picked up Angular on the job and was shipping to the live front end within the first few weeks, building full right-to-left layouts with TypeScript and Bootstrap 5 on Azure.

Freelance Software Engineer, Web & Mobile | Remote | *2023 - 2026 (3 years)*

- Worked remotely with business owners for three years, taking each project from first requirements through launch and handover.
- Shipped Flutter apps for tailoring workshops and restaurants, and a C# desktop system for a pharmacy. The tailoring app messages customers on WhatsApp when their order is ready.
- Built and launched business websites including Olyx, Alkhayala, Helabi and Johnson PPF, with Arabic-first bilingual UI, API and database integration, and local SEO.

Web Developer | KidoCode, Kuala Lumpur, Malaysia | *2022 - 2023*

- Built and maintained the company's web pages and internal tools over one year.
- Turned designs into responsive interfaces and contributed to the Cubie learning platform.

SELECTED PROJECTS

- **CustomStudio** custmiz.netlify.app - Internal product and packaging control system, Arabic-first, one account per role. In progress.
- **Libro** libro-mea.com - Bilingual online store for smart watches and bracelets.
- **Ashal IT Solutions** ashalfront.azurewebsites.net - Angular front end for an integrated IT-solutions company.
- **Olyx** olyxsa.com - Agency platform where each client gets a bilingual site and an Arabic admin panel they run themselves.
- **Johnson PPF** johnson-ppf.com - Site for a car-care studio, with booking requests going straight to WhatsApp.
- **Taqaseem** - Flutter app for tailoring workshops: measurements, fabric stock, order stages and WhatsApp updates.

EDUCATION

BSc (Hons) Software Engineering - Dual Degree
University of Central Lancashire (UCLan), United Kingdom - 2024 | SEGi University, Malaysia - 2023

LANGUAGES

Arabic: Native | English: Advanced
